WEB PROJECT SHOWCASE

NinExpo eShop

One storefront for Nintendo Switch, PlayStation and Xbox games

HTML CSS JavaScript EmailJS

Presented By: Azy

THE PROJECT

One shop, three platforms

NinExpo eShop is an online game store that runs entirely in the browser. Players create an account, browse games for Nintendo Switch, PlayStation and Xbox, save favorites, and check out with their choice of delivery and payment.

Orders come with a delivery estimate for Disc/Card copies and a unique promo code for every digital copy, sent straight to the player's email.

72
games in the catalog

3
platforms in one store

5
payment methods

7
display currencies

HOW IT'S BUILT

Built with HTML, CSS and JavaScript

HTML

Structure

Every screen: sign-in, store, cart, profile and pop-ups.

`index.html`

CSS

Look and motion

Dark theme, platform colors, animations and phone layouts.

`styles.css`

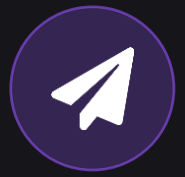

JavaScript

Logic

Accounts, catalog, search, wishlist, cart and checkout.

`script.js`

EmailJS

Receipt emails

Sends the order receipt to the player's inbox.

`@emailjs/browser`

Storage

Saved data

The browser keeps accounts, carts, wishlists and orders.

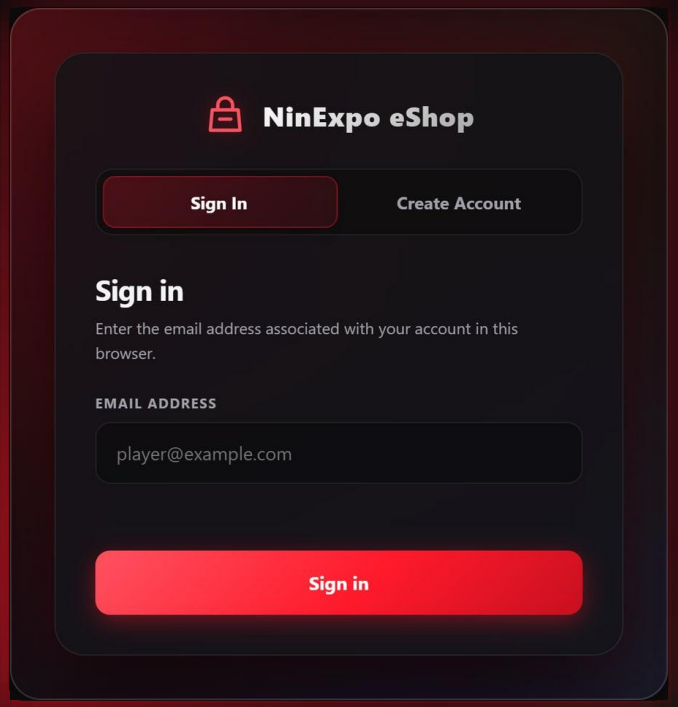

`localStorage`

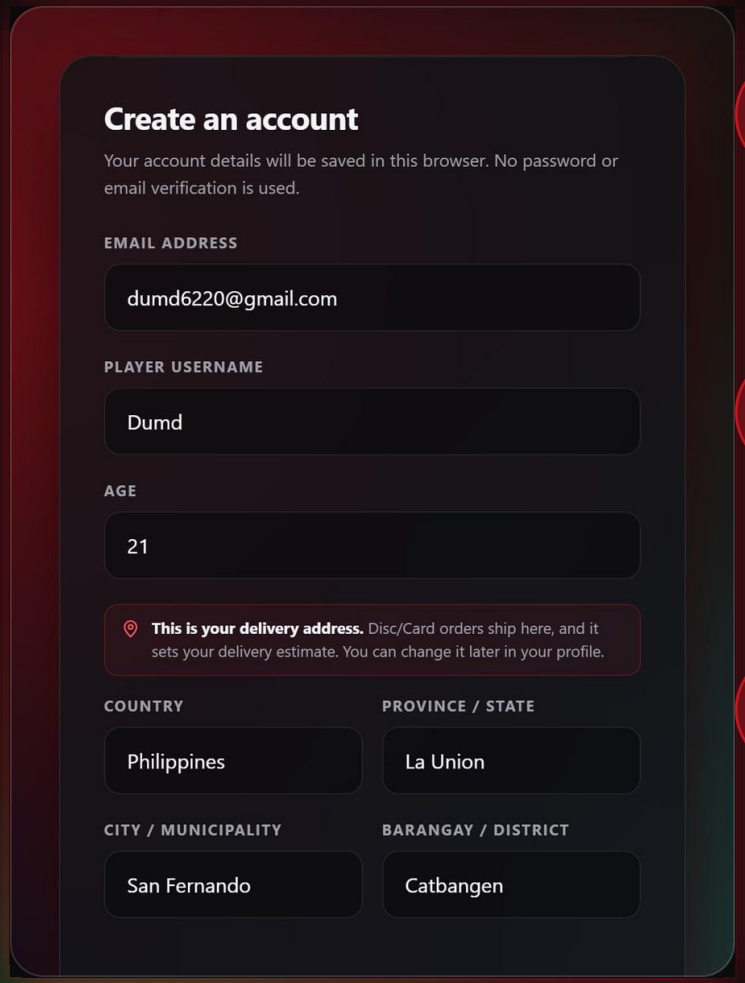

No backend server or database: the whole store runs in the player's browser.

GETTING STARTED

Sign in or create an account

Email-only accounts

Sign in with just an email address. Accounts are saved in the browser.

Delivery address at sign-up

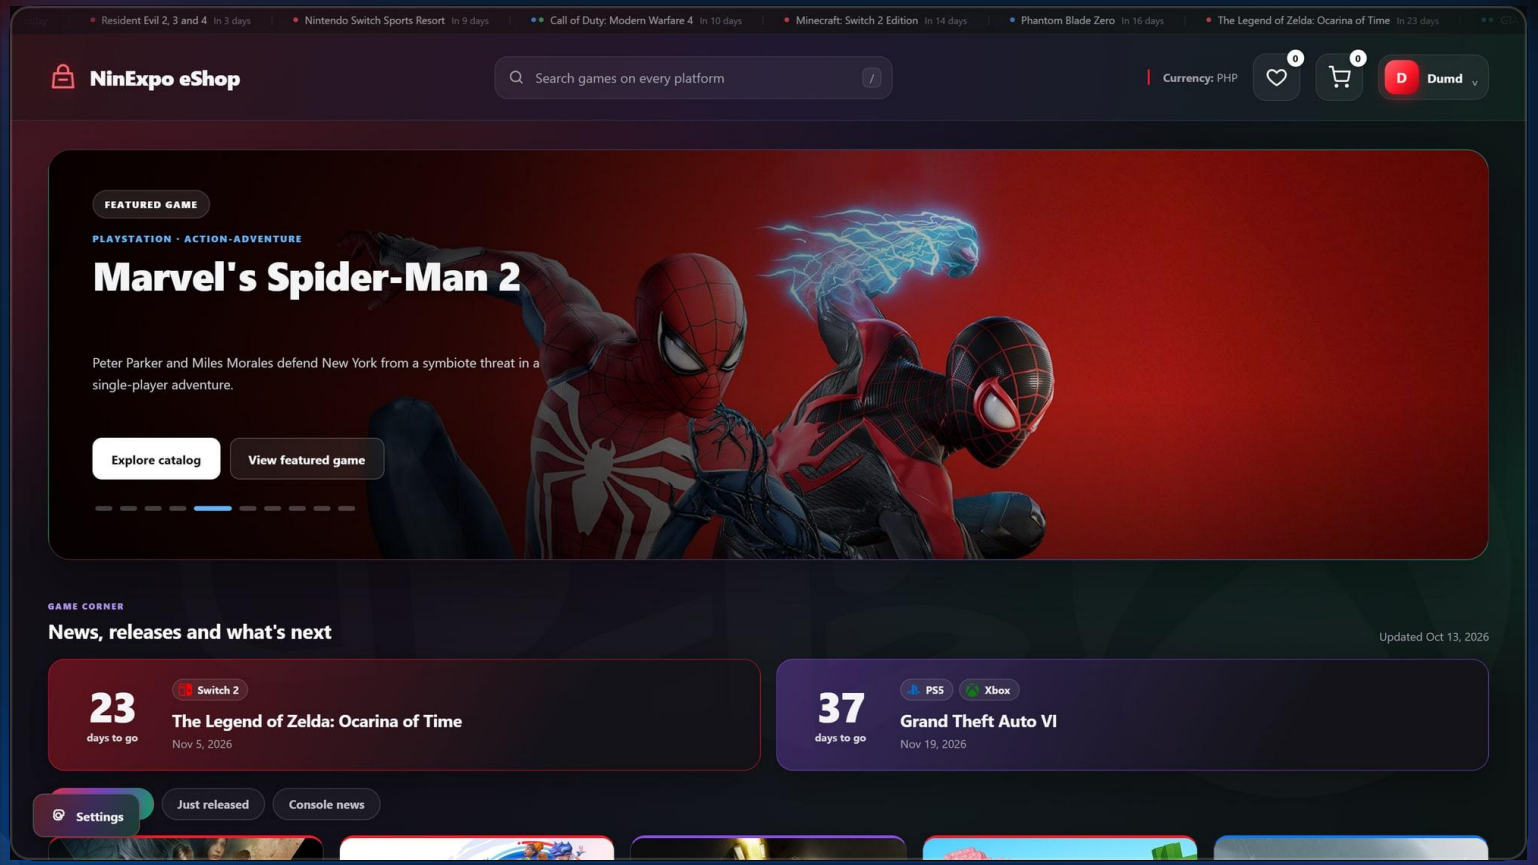

Used to ship Disc/Card orders and estimate the delivery date.

Smooth, friendly form

Sliding tabs, unfolding fields and clear messages when something is wrong.

HOME DASHBOARD

Everything new, on one home page

Featured games rotate

A new game every 5 seconds, with its own art.

Game news ticker

Upcoming releases scroll quietly along the top.

Release countdowns

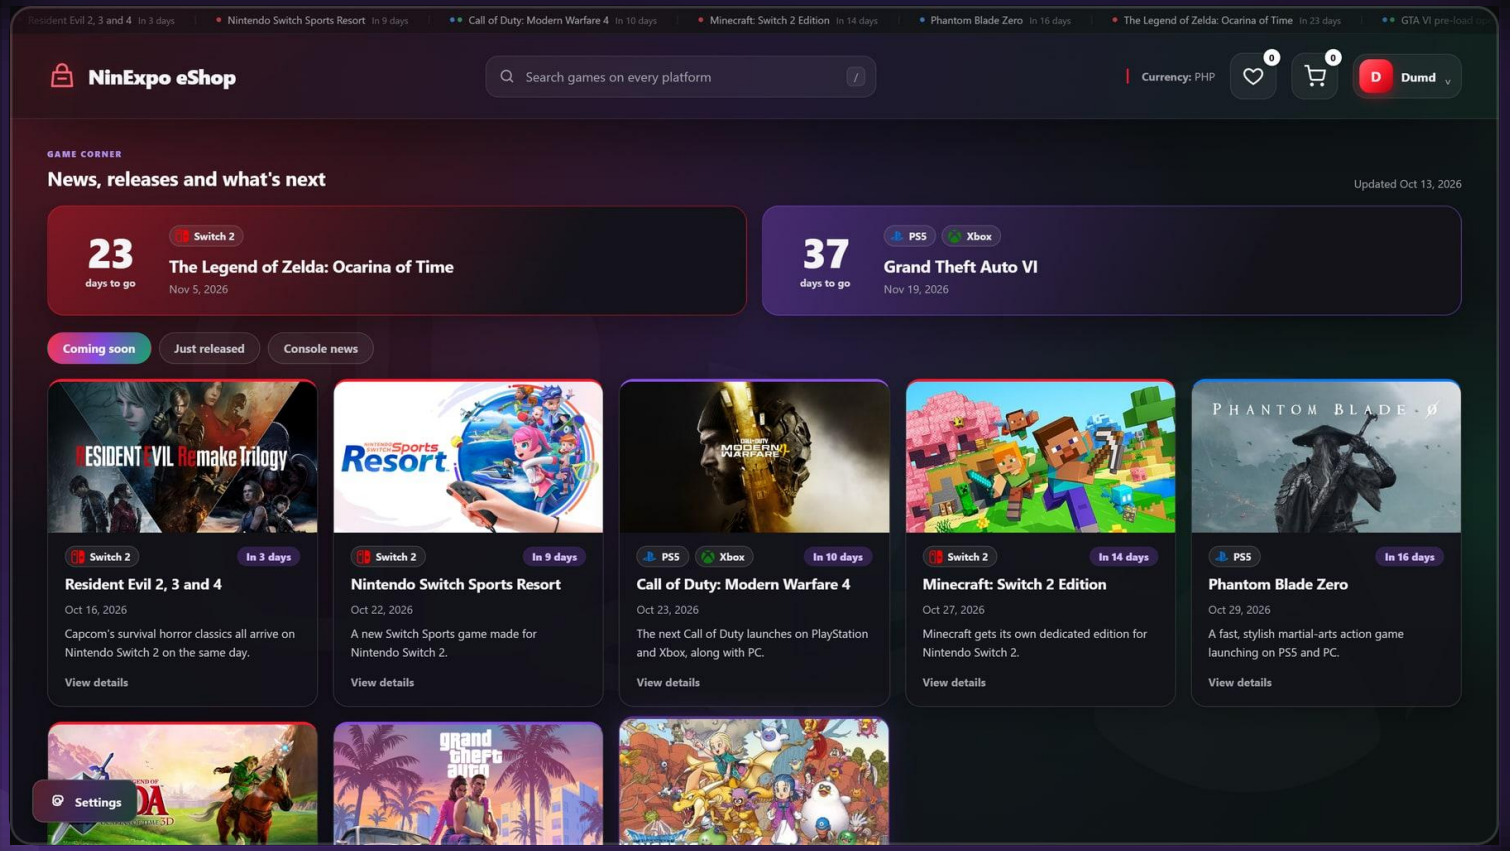

Game Corner counts down the days to big launches.

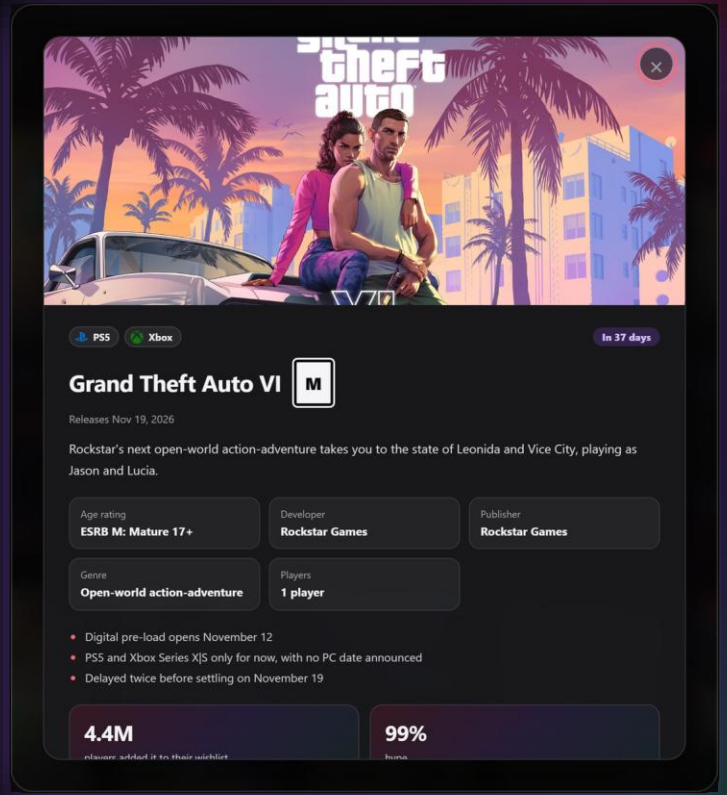

Top picks

Fan favorites from every platform, one click away.

GAME CORNER

News, releases and what's next

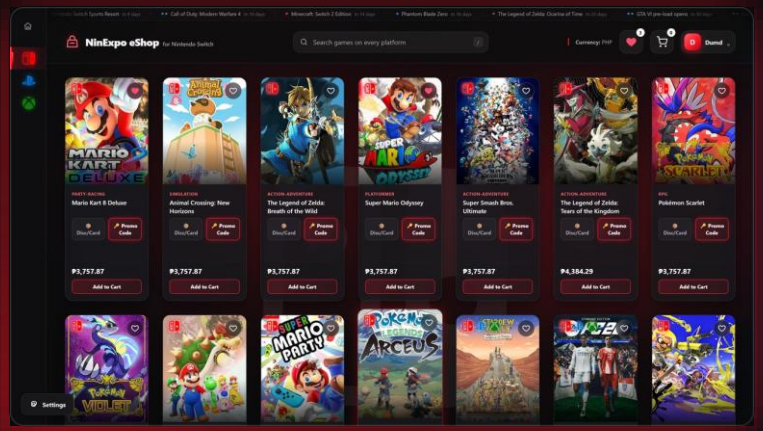

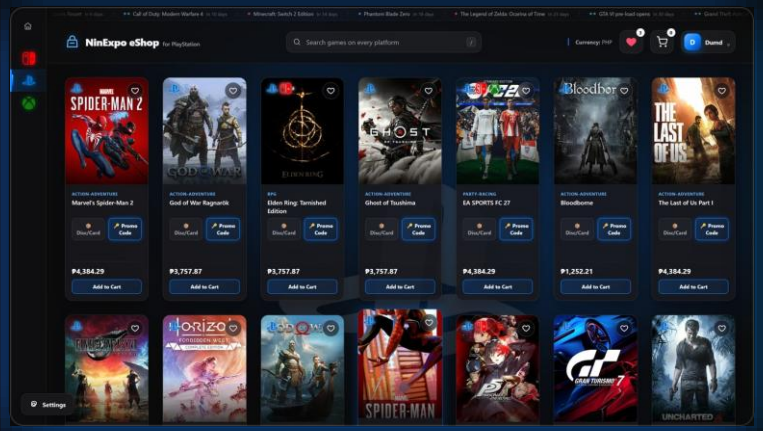

Open any story for the full details, then add upcoming games to your wishlist.

PLATFORM STORES

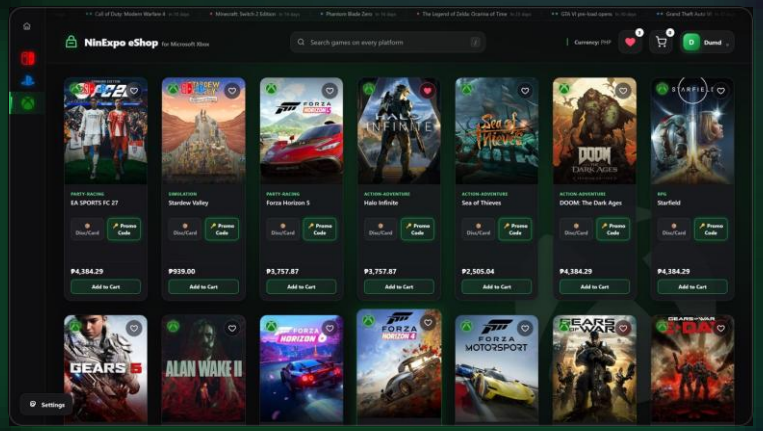

Three platforms, one store

Nintendo Switch 23 games

PlayStation 24 games

Xbox 25 games

Colors follow the store

Each store has its own accent color and background logo.

Genre filters

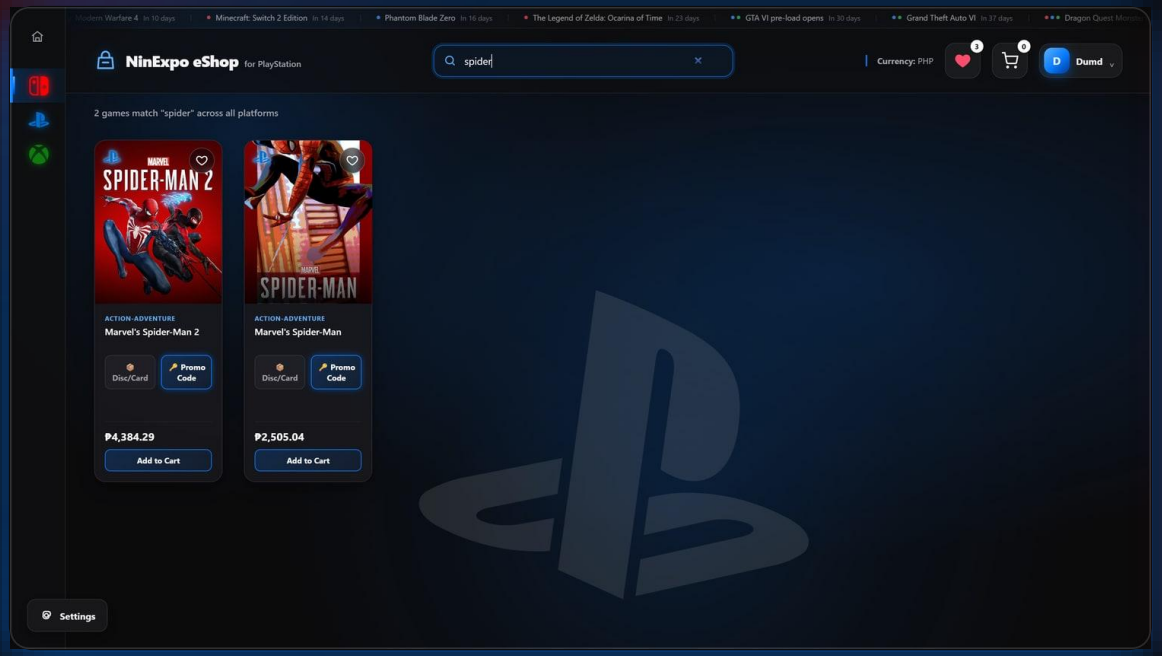

Action-Adventure, RPG, Platformer, Simulation, and Party and Racing.

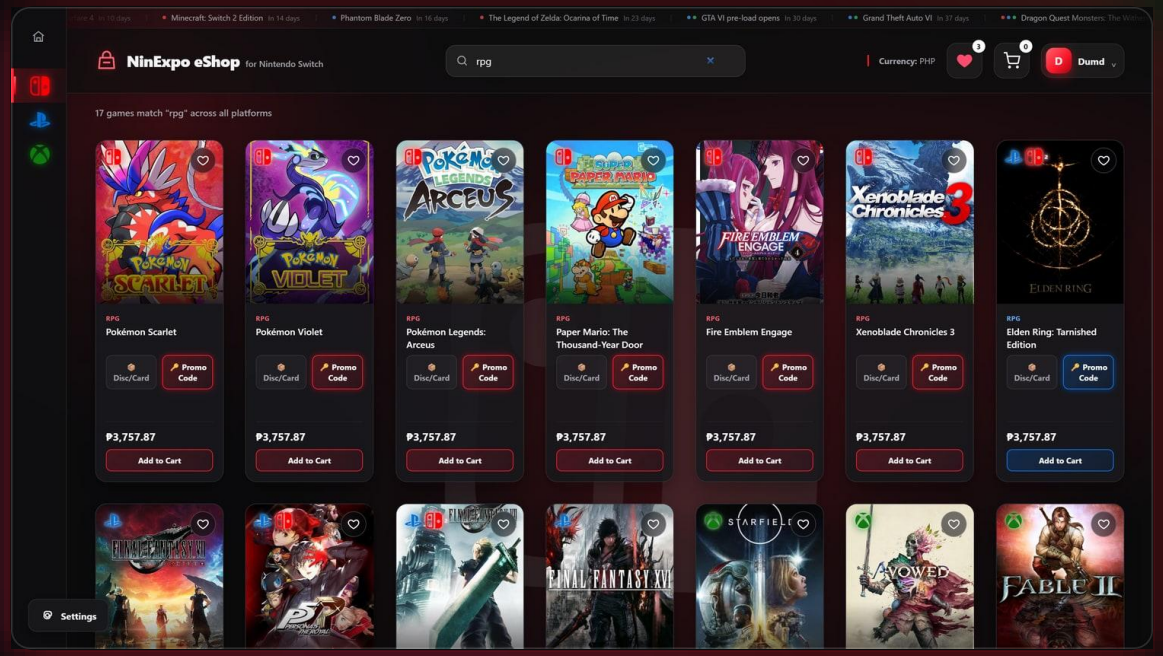

Online memberships

Compare membership plans for every platform.

SEARCH

Search every platform at once

“spider”: all PlayStation results

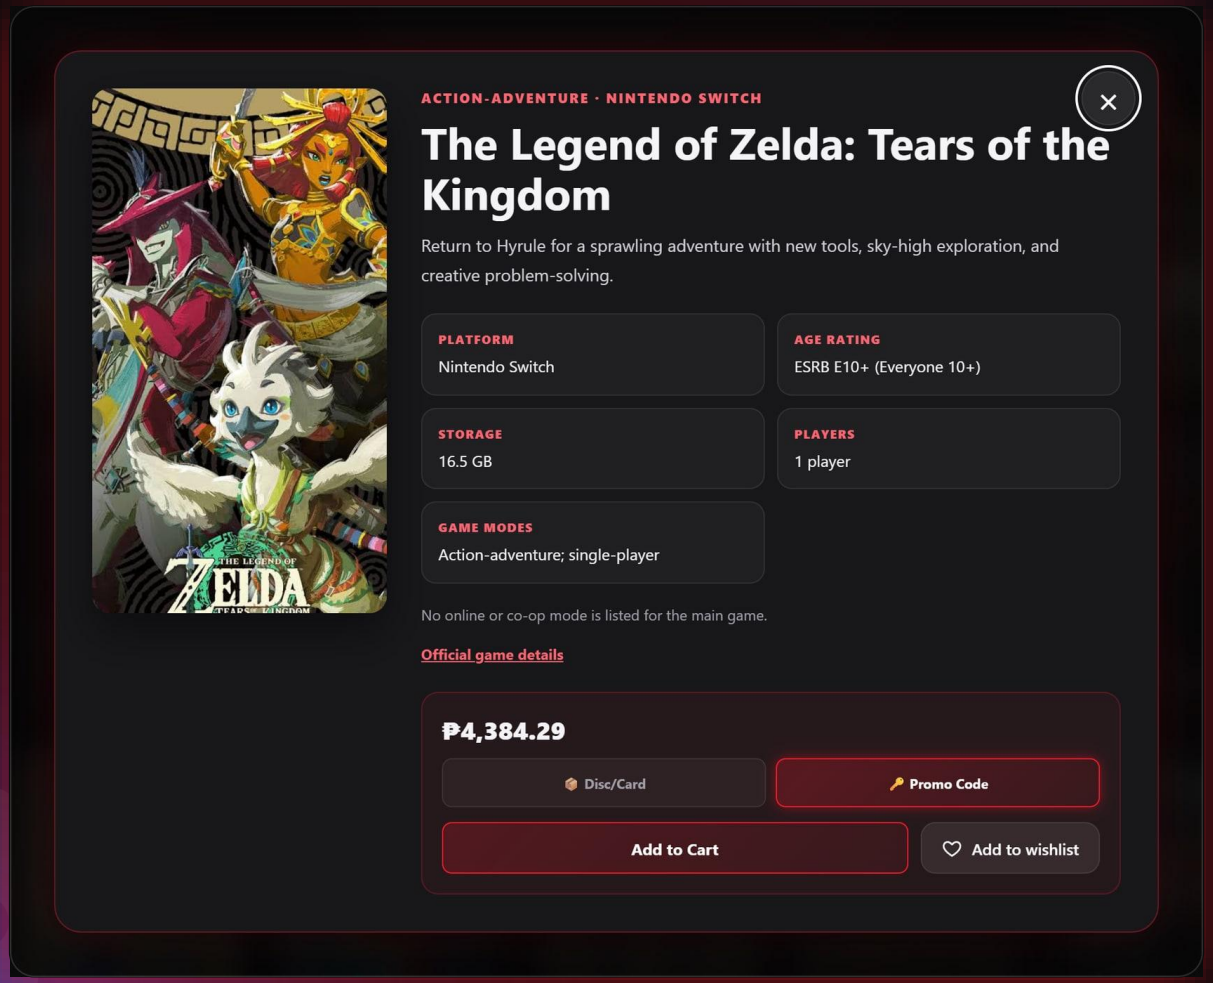

So the whole page switches to PlayStation blue.

“rpg”: results from every platform

Each game keeps its own platform color. Typing “pokemon” still finds Pokémon.

GAME DETAILS

Everything about a game in one window

Facts at a glance

Platform, age rating, storage, players and game modes.

Disc/Card or Promo Code

Choose a physical copy or a digital code before buying.

Save for later

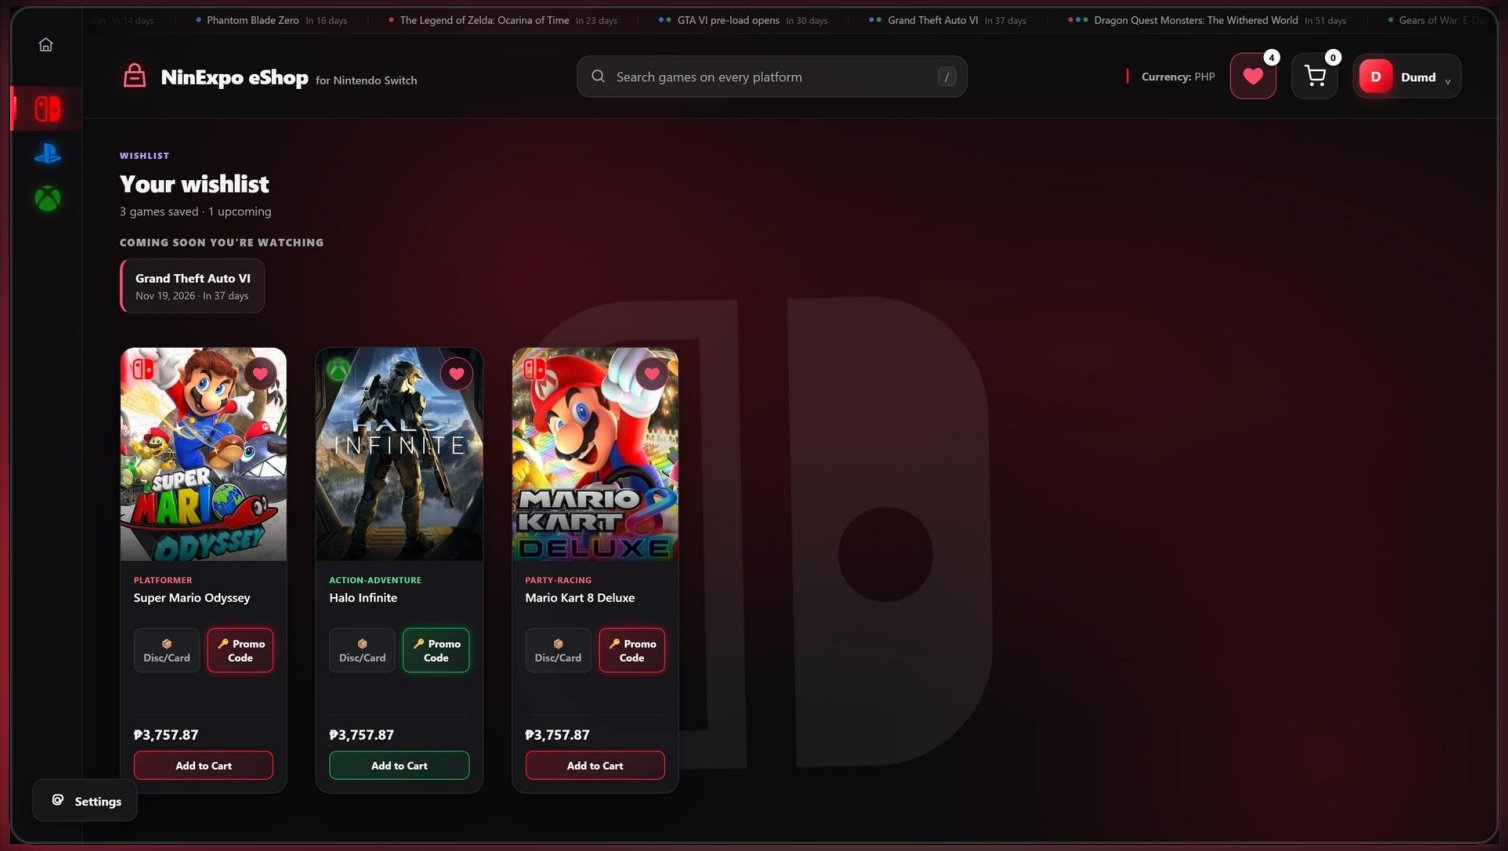

Add the game to the wishlist from the same window.

Platform colors

The window takes on the game's own platform color.

WISHLIST

Save games for later

A heart on every game

One tap saves a game. The header heart shows how many are saved.

Upcoming games too

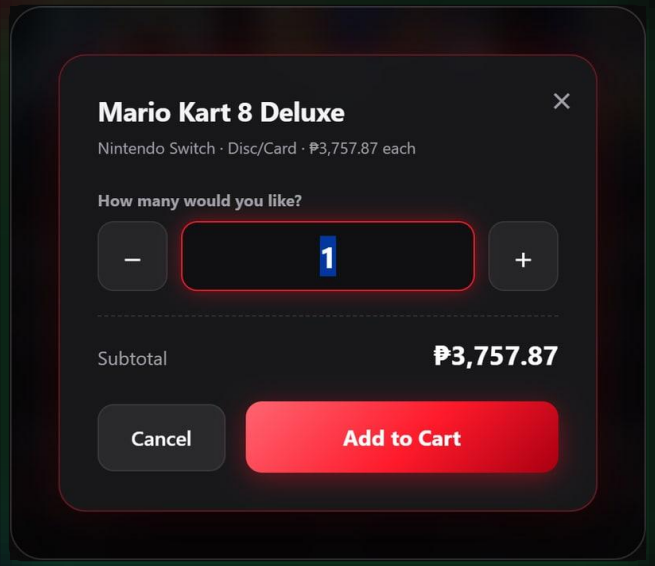

Watch releases like GTA VI straight from Game Corner.

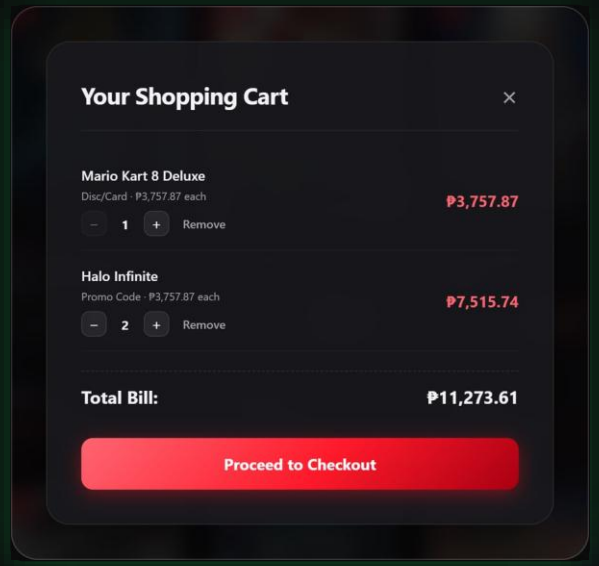

Saved to the account

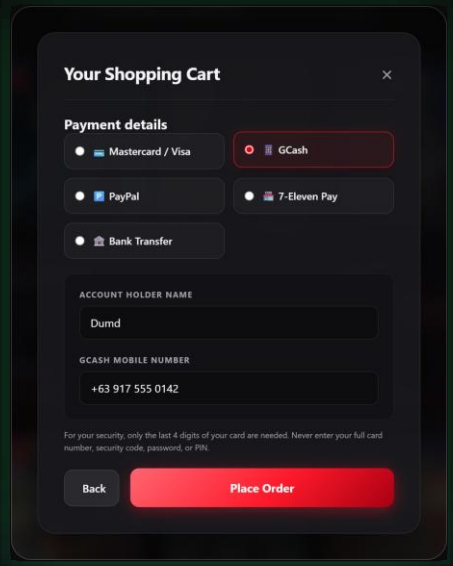

The list is still there after signing out and back in.

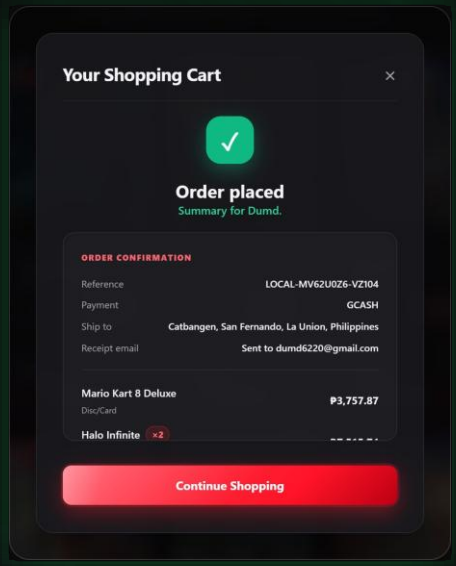

CHECKOUT

From cart to confirmation in four steps

1 Choose quantity
Pick how many copies, up to 99.

2 Review the cart
Change amounts or remove games.

3 Pick a payment
Card, GCash, PayPal, 7-Eleven or bank.

4 Order placed
Reference, promo codes and delivery date.

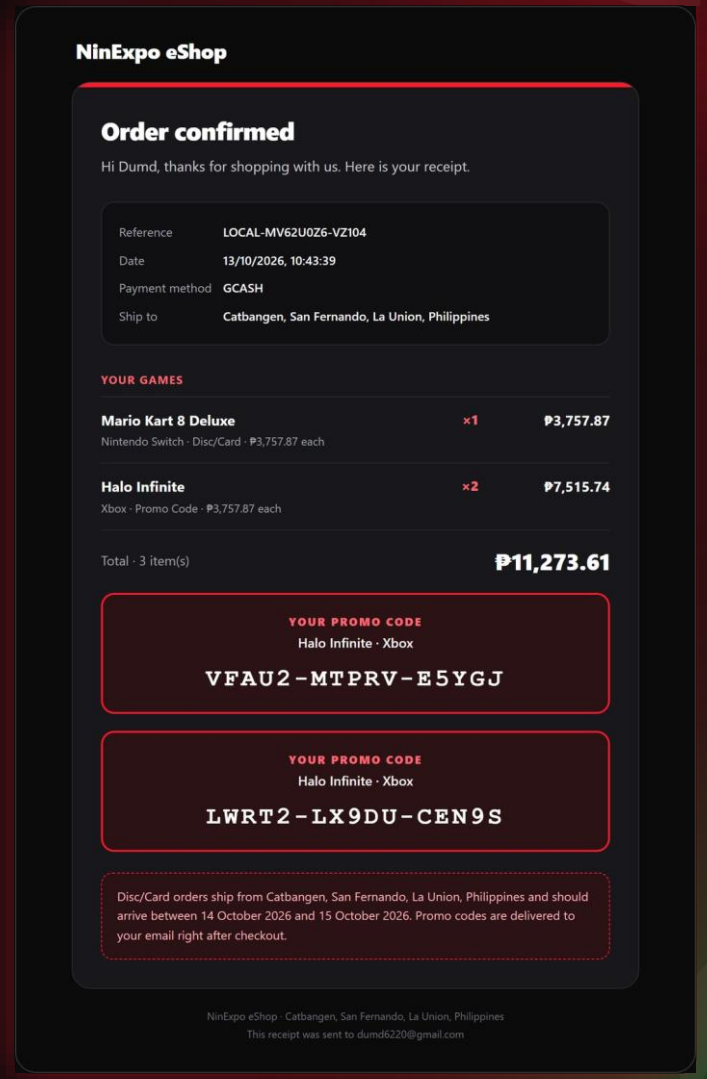

RECEIPT EMAIL

Receipts sent with EmailJS

Player places an order → **EmailJS sends the receipt** → **It arrives in their inbox**

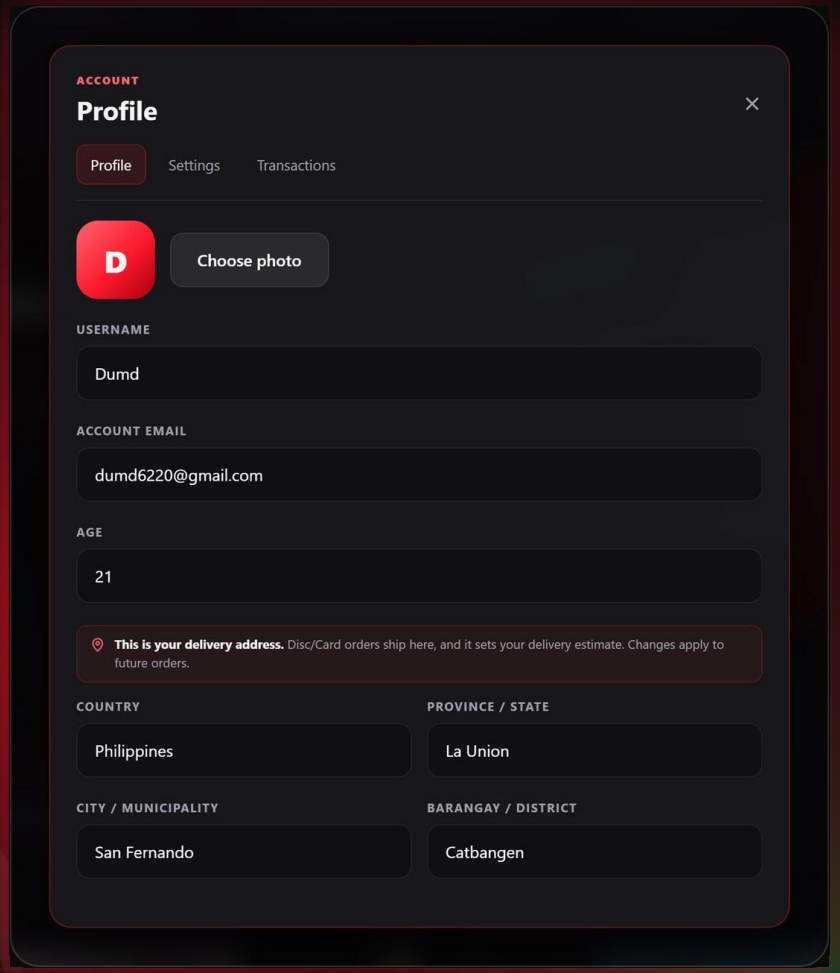

```
emailjs.send(SERVICE_ID, TEMPLATE_ID, {
  to_email, to_name, order_id,
  orders, order_total, promo_codes,
  ship_to, delivery_estimate
});
```

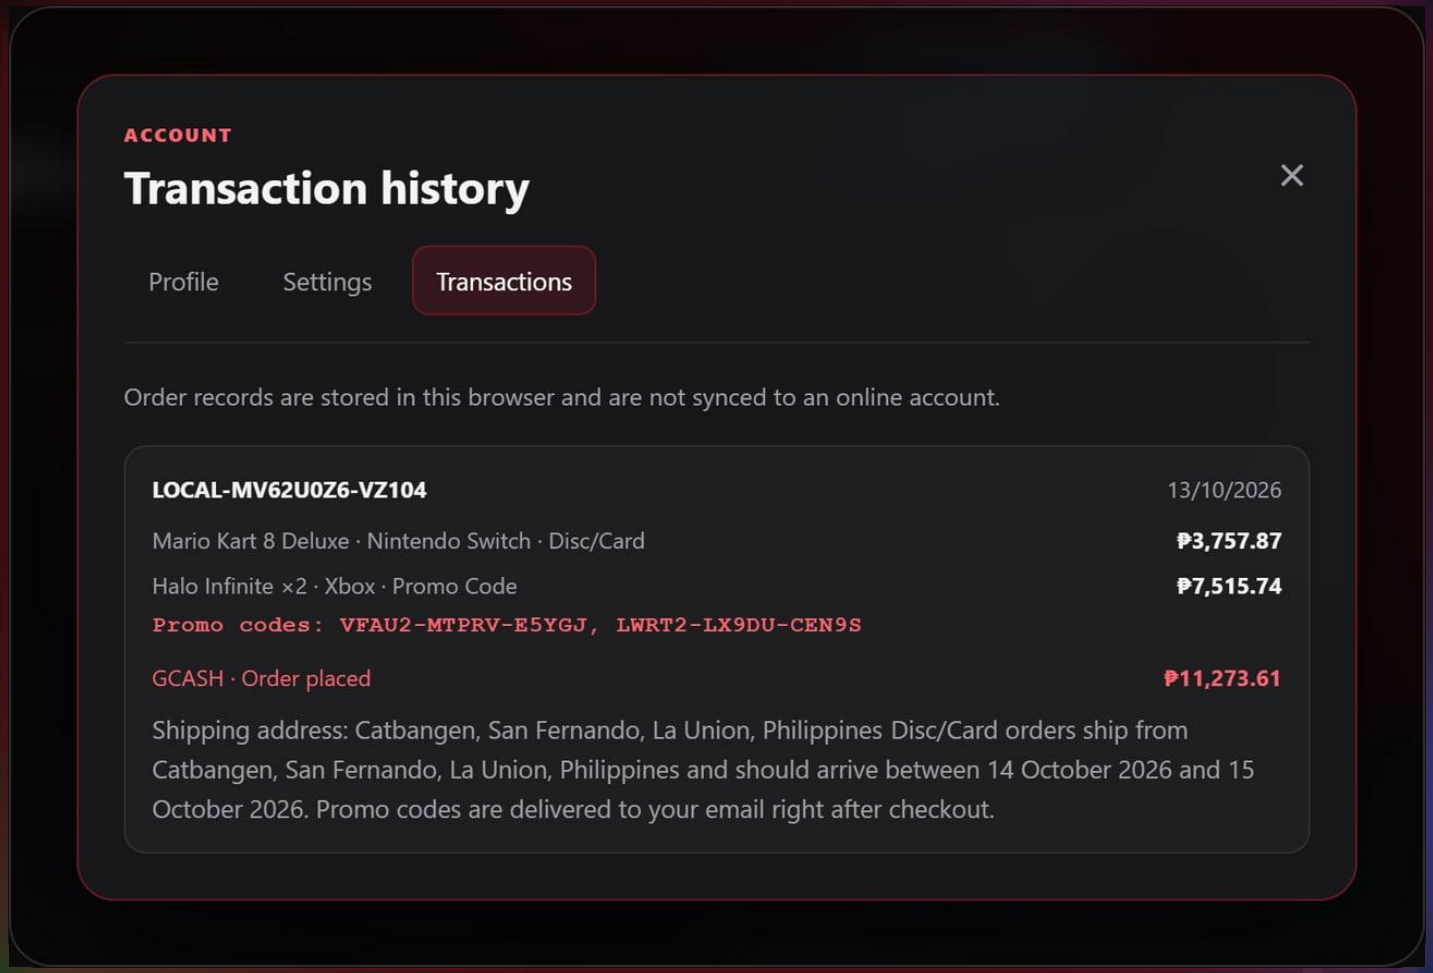

Each digital copy gets its own promo code, shown in big boxes in the email.

ACCOUNT

Profile and order history

DESIGN AND MOTION

Designed to feel alive

Page transitions

Every page slides or rises in smoothly.

Platform color sweep

Changing stores sweeps the new color across the screen.

Living background

Logos and color glows drift and follow the mouse.

Rotating spotlight

The featured game changes every 5 seconds.

Animated sign-in

Sliding tabs, unfolding fields and a gentle shake on errors.

Smooth pop-ups

Windows fade in and out instead of just appearing.

Motion turns off automatically for people who set their device to reduce motion.

RESPONSIVE

Works on phones too

Same store, smaller screen

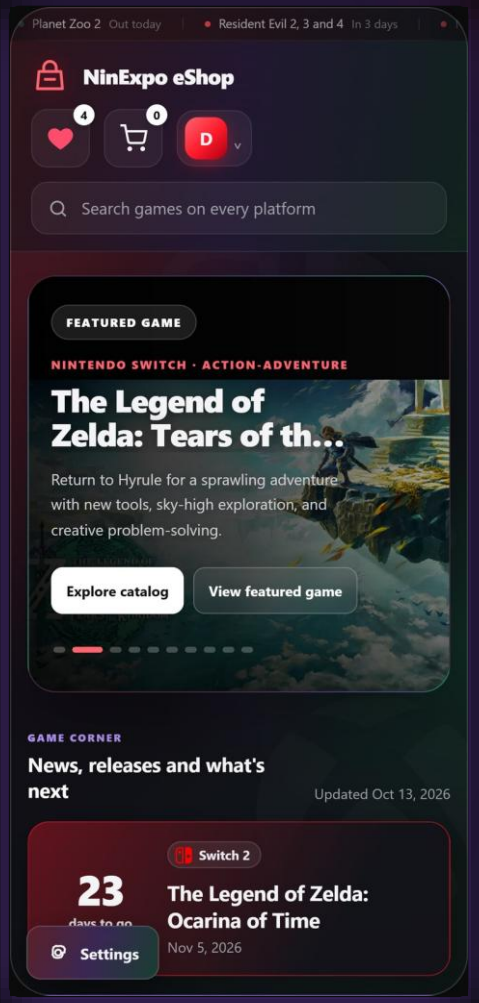

Layouts reflow for phones with no sideways scrolling.

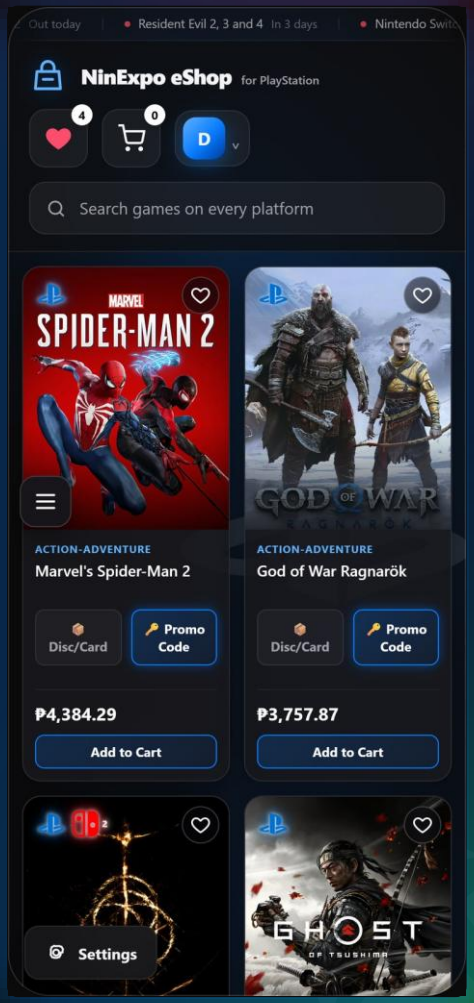

Full-width search

The search bar moves to its own row under the header.

Every feature included

Wishlist, cart and checkout work exactly the same way.

NINEXPO ESHOP

Thank you

Built with HTML, CSS, JavaScript and EmailJS.
